'**Works on Paper**' is devoted to one of the most significant moments of the creative path of an artist, the work on paper. The exhibition wants to tell the beauty of a support that still today, in the era of the virtual, welcomes and preserves works of the most significant contemporary artists delivering a revealing dimension: the moment when a work of art is born through work preparatory or, as for the works selected for the occasion, the expression of choice for a research that finds its most complete poetics on paper.
